069534 Singapore

Dear Martin,

As we discussed in our meeting on May 5th in Singapore, I am very interested in the Koobatra Automated Ovitrap for my own use at my home as well as possible distribution in Thailand. As per your request, I am writing this letter to acknowledge my interest.

I understand that the concept of the Koobatra Automated Ovitrap business model involves online surveillance of its operation and maintenance by Koobatra certified staff. When you have confirmed with the appropriate authorities that operation of these devices is allowable in Singapore and you have maintenance services set up, I will help connect you with friends in my professional network who I think will find this product of interest for use in their landed homes in Singapore.

Please keep me posted on the approval by the authorities in Singapore. This will be a key factor in presenting the solution to the market throughout the region. Once the approval has been obtained, I will recommend that our villa estate in Phuket installs units throughout the estate. (approximately 20,000 square meters) Then we can also continue our discussion about setting up distribution in Thailand. I think the installation here in our villa estate can serve as an effective showcase for sales purposes.

Sincerely,

Pete Bonee
